DATA VISUALIZATION ASSOCIATE EARLY INTERNSHIP REPORT

Presented By TEAM 33

Lead by: Arpan Kumar De

STAGES

Week 1

Data Understanding, EDA, and Cleaning

Week 2

Data Transformation & Master Table Creation

Week 3

Development of Data Visualizations in Looker Studio

Week 4

Compilation of Findings & Final Presentation

WEEK 1 & 2

01

Data Exploration and Cleaning

- Addressing Missing Values: Identifying and handling any gaps in the data.
- Removing Duplicates: Ensuring that each entry in the dataset is unique.
- Correcting Inconsistencies: Standardizing data formats and values to maintain integrity.

02

ETL Process Development

- Creating a Master Table: Consolidating data into a single, comprehensive table.
- Defining Key Relationships: Establishing how different data points relate to one another.
- Transforming Data: Modifying the data to meet analysis requirements.

WEEK 3 & 4

03

Mapping Table and Dashboard Design

- Addressing Missing Values: Identifying and handling any gaps in the data.
- Removing Duplicates: Ensuring that each entry in the dataset is unique.
- Correcting Inconsistencies: Standardizing data formats and values to maintain integrity.

04

Insights Extraction and Presentation

- Compiling Findings: Organizing insights into a structured and visually engaging slide deck.
- Delivering a Final Presentation: Presenting the findings to senior management.

Summary

Key Performance Indicators

The platform demonstrates substantial operational scale:

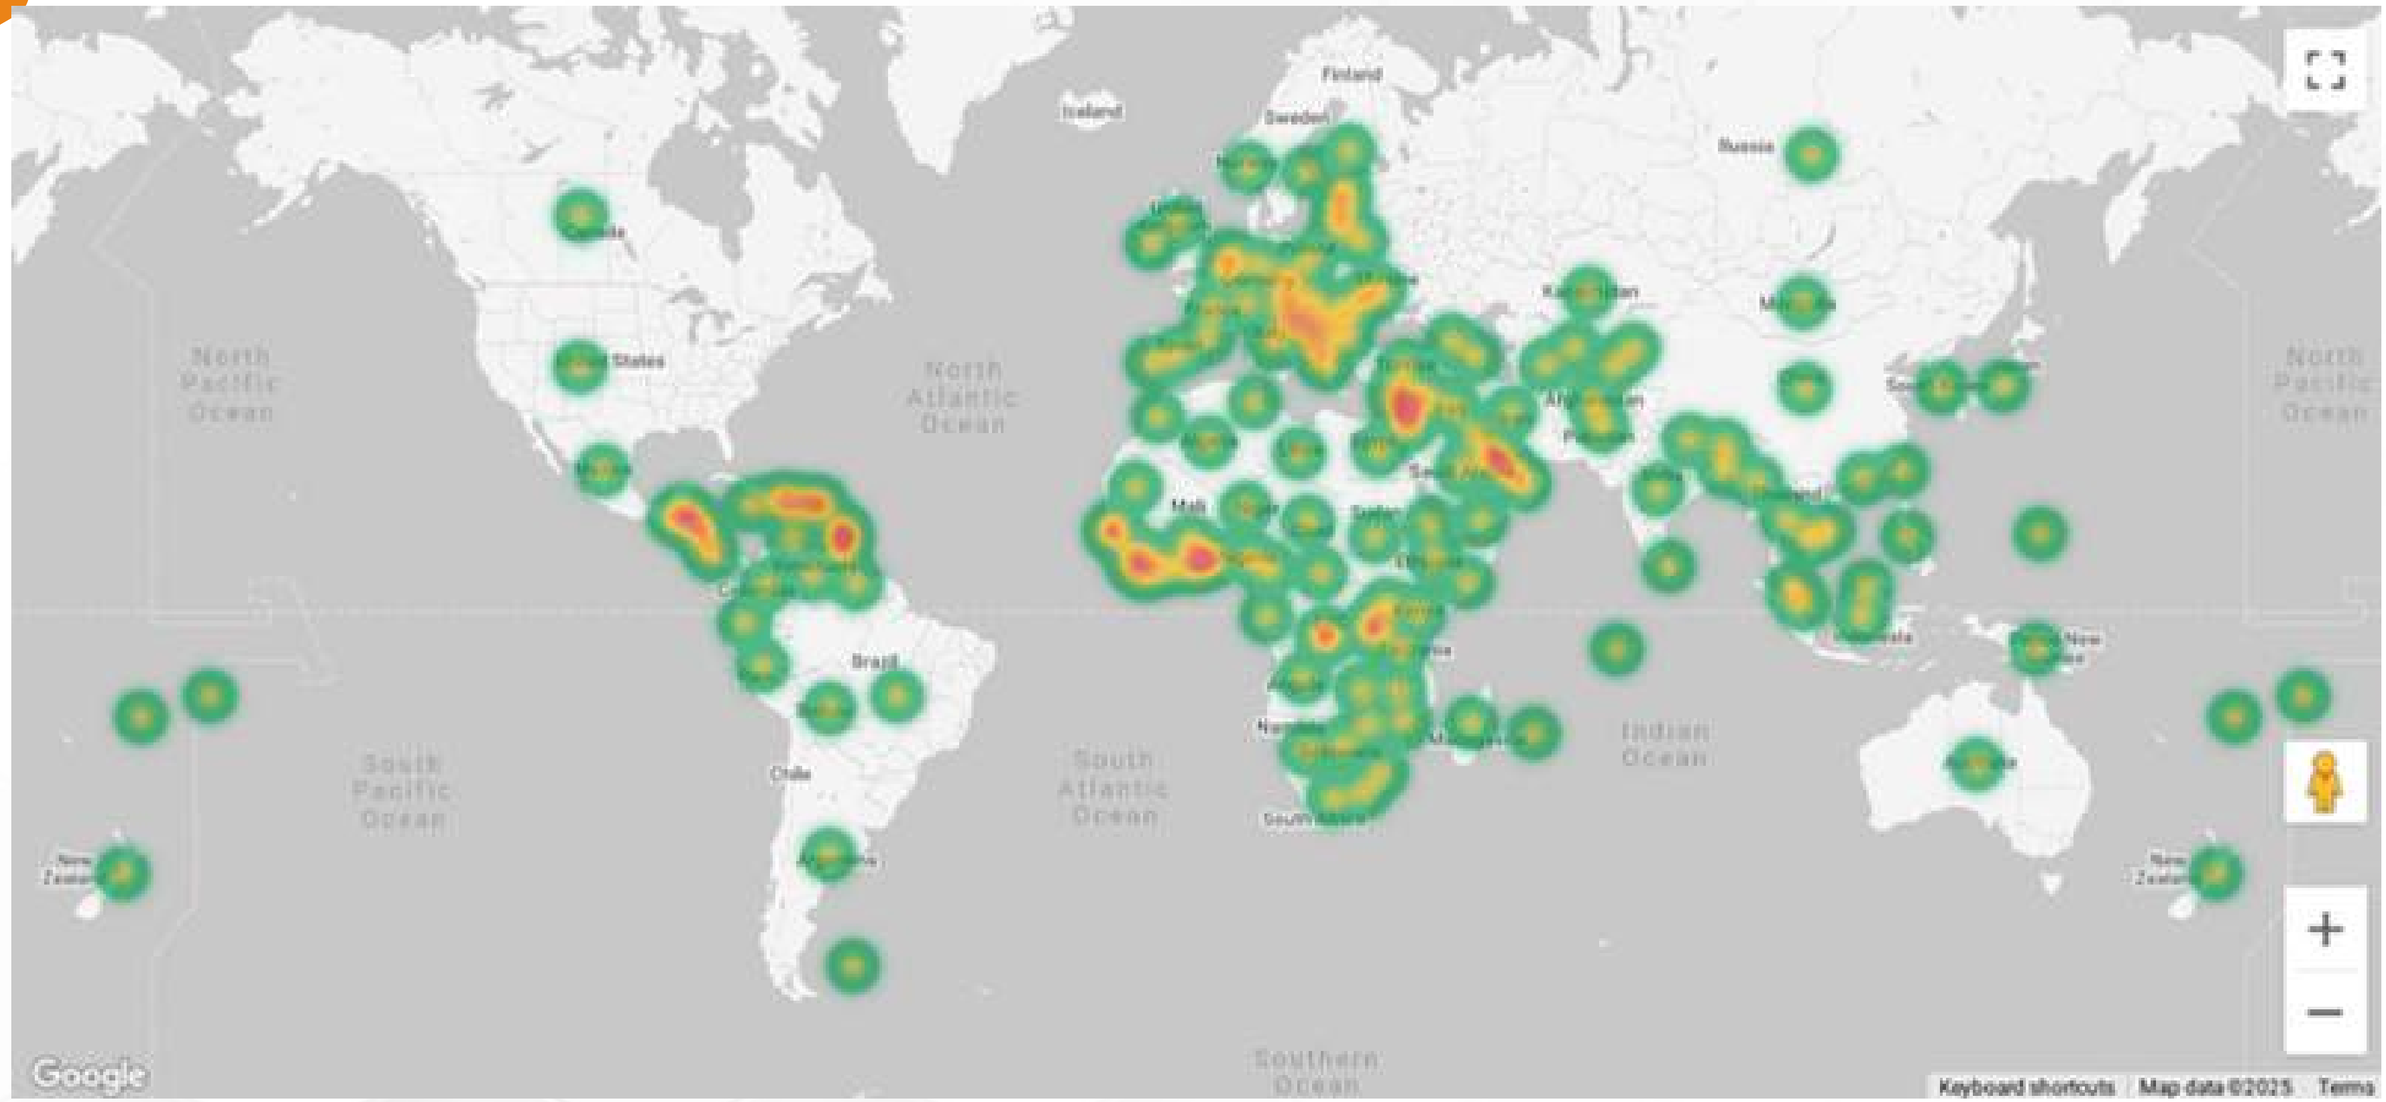
- Total Opportunities Available: 187 programs
- Total Marketing Investment: 340,830 AED
- Total Marketing Results: 365,031,956 outcomes
- Total Cohort Participants: 3,668,770 learners
- Global Market Coverage: 154 countries

Record Count	institution	opportunity_name	category	country	city
131.7K	34.4K	166	7	154	12,305

Digital Marketing Campaign Performance

Metric	Value
Total AED Spent	243,641.41
Total Results (Conversions)	182,515
Avg. Cost per Result (AED)	3.24
(Aggregated across all campaigns)	

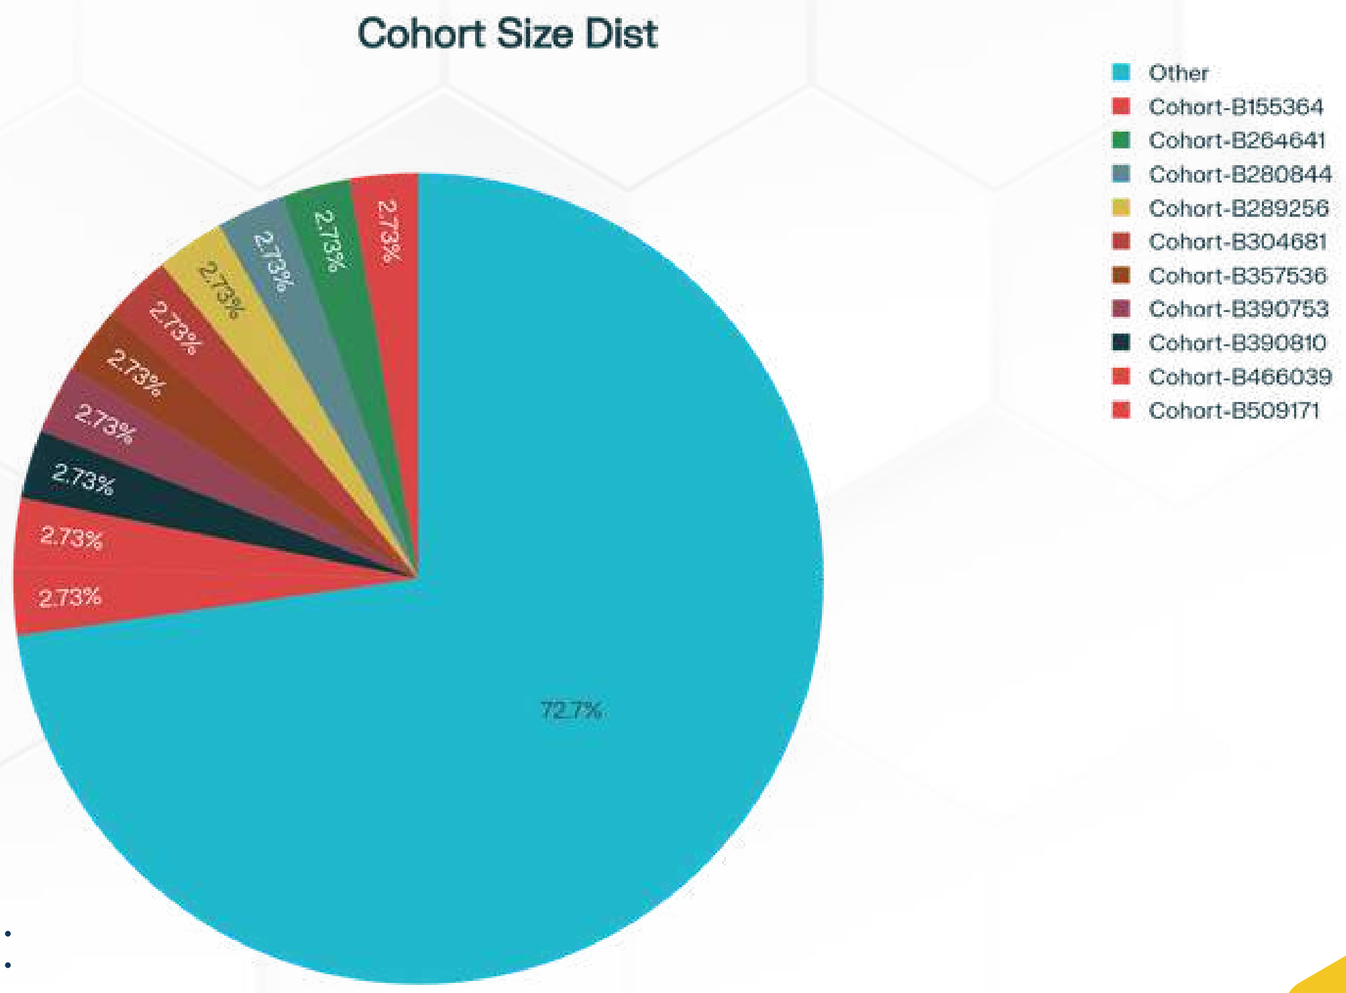
Cohorts by Country



Cohort Size Distribution

Most cohorts fall in the 501–1,000 and 1,000–5,000 participants range.

Very few cohorts exceed 10,000 or are under 100.



Highlights

01

Extensive and High-Spending Marketing Campaigns

The data files file highlights extensive campaigns, with some reaching over **100 million people**. For instance, the **"March Brand Awareness"** campaign had a reach of 141,835,342. Additionally, significant ad spending is evident, with individual campaigns exceeding **AED 20,000**. This indicates a strong investment in marketing aimed at enhancing brand visibility and driving web applications.

02

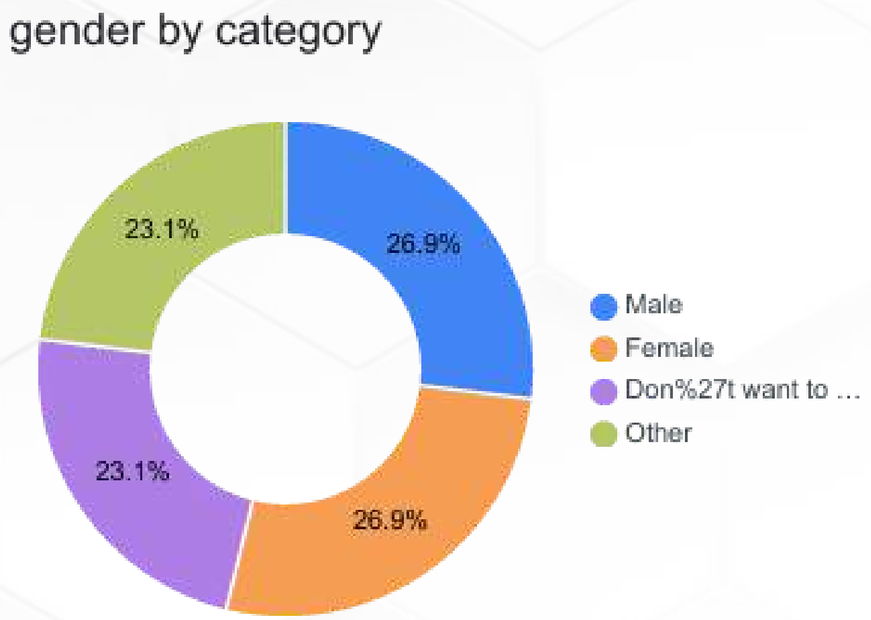
Diverse and Repeated Program Cohorts

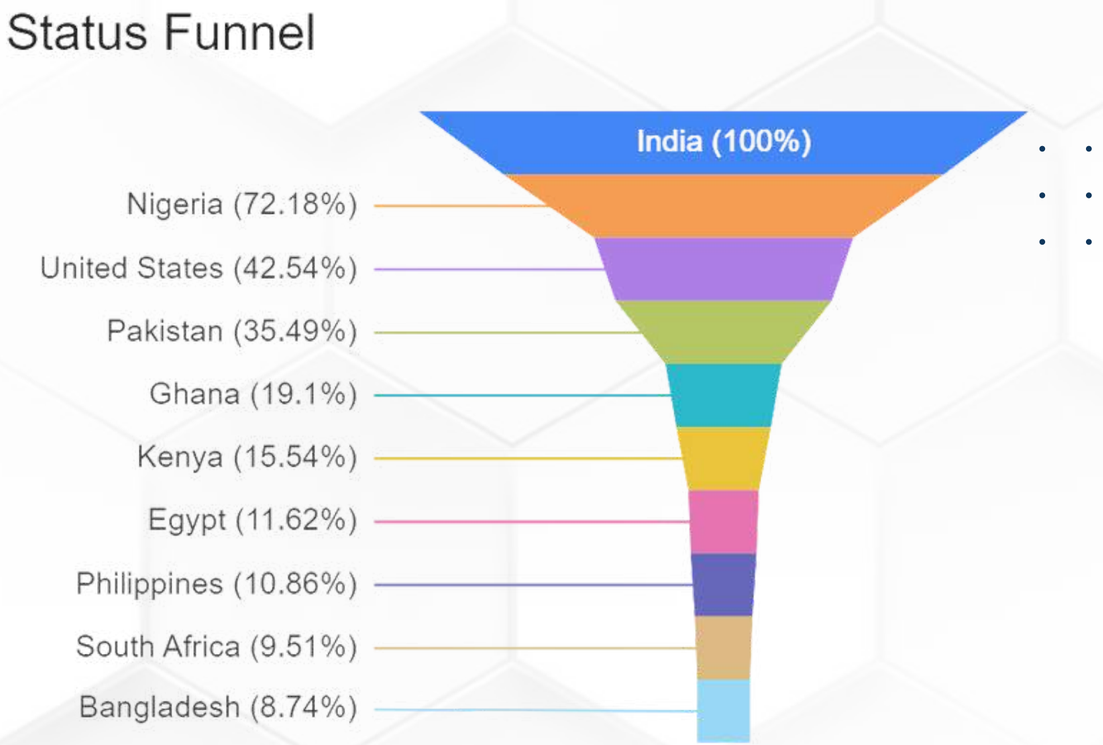
The other file reveals numerous program cohorts launched over the years, with sizes ranging from single digits to over **100,000 participants** in some cases. This indicates a highly scalable educational or engagement platform that continuously runs and iterates various cohorts to attract diverse audiences.

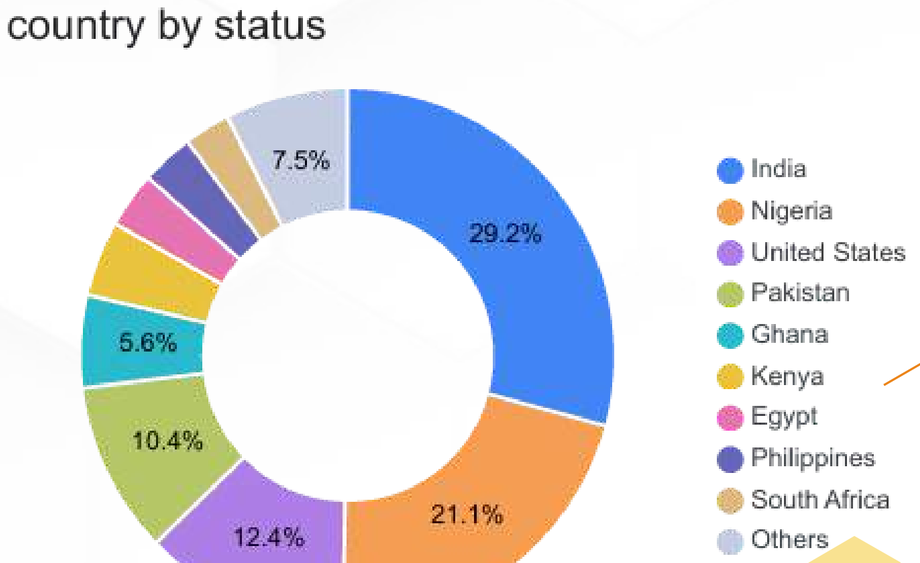
Diversity Overview

Country, Gender & Status

- Male and Female participants are equally represented at 26.9% each.
- Participants span across 10+ countries, reflecting strong international reach.
- Steep drop-off seen beyond the top three countries - Pakistan, Ghana, and Kenya trail behind.







Conclusion

🌍 3.66M learners | 154 countries | 365M+ outcomes

⚖️ Balanced gender diversity & strong global reach

📈 Mid-sized cohorts show scalability & engagement

🎯 Insights drive future targeting, optimization & growth

THANK YOU
